

MOTION LIGHT INSTALLATION PROGRAM FOR NEW SEABURY RESIDENTS

It has been recognized that motion lights offer some additional security, thus, we are offering our homeowners the opportunity to participate in this new program. Our electrician will install motion lights on your house at a discount. The discount will obviously depend on a variety of things, not the least of which is the number of residents participating, but in general, we have negotiated rates that will beat most of the local electricians in the area. The estimated prices from Coastal Light Electric are listed below.

Complete price of a motion light = installation + spot light + motion light

Installation:

Basic (existing spot light is already there) \$75

Custom (new wires need to be run) starting from \$150

Spot Light:

Complete spot light with two flood lights \$35

Motion light:

Good – RAB GT500W Gotcha \$46

Better – RAB STL200W Stealth \$72

Best – RAB STL360W Stealth \$93

(These are estimated prices for residential customers only.)
