

M. Mailboxes

1. The Architectural Review Committee has four approved designs for an integrated mailbox and/or newspaper receptacle to be used in the New Seabury community. The following are approved mailboxes:

- Birdhouse mailbox with the newspaper receptacle and mailbox side-by-side;
- Post mailbox with the newspaper receptacle below the mailbox;
- Single post with dual mailboxes with newspaper receptacle below the mailbox; and
- Single post with dual mailboxes;

The **post must be wood or a new composite material such as Azek** that can be painted as wood to match your home. Height of the post should be 42"- 44". The mailbox should be a neutral color to blend with your post or home. (i.e. gray, taupe, ivory)

A sample of an Azek post with mailbox is available at the ARC office.

It is strongly suggested that neighbors consider sharing a post and attach two boxes to eliminate mailbox clutter along the streets.
