

POINTS of INTEREST:

2 Beautiful Ponds on the Blue Trail

EACH SEASON HAS ITS OWN NATURAL BEAUTY

Spring... Watch for migrating ducks, the awakening of frogs, and the many species of budding bushes and trees.

Summer... Look for summer breezes playing with the pond surface... Fish, frogs, turtles, ducks, comarands, osprey and more.

Autumn... Unlike most Cape Cod terrain, there are considerable deciduous trees and shrubs offering colorful New England foliage displays.

Winter... Ice, snow, shadows and occasional ice skating complete the cycle.

TAKE ADVANTAGE OF SERENE RESTING STOPS AT KEY VIEWING AREAS

A Few Quick Notes:

- 1) Please be considerate of your fellow walkers, as well as homeowners whose homes abut the trails and ponds.
- 2) Do not litter trails, ponds, etc...dispose of all trash properly. Help keep our environment clean!
- 3) Fish Release Rule - When fishing, please return all fish caught to their natural habitat, the pond. This will allow all who fish the opportunity to enjoy this hobby.
- 4) Lastly, have fun, get fit, and enjoy nature at its finest!
