

Home Security System Installation Program

Intercity Alarms continues to work the Peninsula Council and New Seabury residents on the installation of home security systems at a discounted rate for residents within our community. The discounted rate depends on multiple issues and what the individual homeowner's desires are for a system. Intercity will install new alarm systems, add components to your existing system or replace your system with theirs, and the cost will be associated with your request.

If you would like information on home alarm installations, call Intercity Alarms at (800)-872-9823 and ask for Tyler Newcomb.
